Electrical [-20]; Appearance: Monstrous [-20]; Callous [-5]; Maintenance (weekly, 2 people) [-10]

This is just the basic package. Other options can be added as needed (and as the CP budget allows). Among the more common add-ons are Extra Arms (frequently with Extra-Flexible or Weapon Mount) or integrated weapon systems. Many abilities from Gurps Advantages are also appropriate (esp. the Cyborg Upgrades).

Cyborg - Partial Reconstruction [+200]

by zorg

With partial bionic reconstruction, the limbs are exchanged for cybernetics while vital organs are strengthened. Torso and head remain more or less organic.

There are many different ways to partially borg someone: You must choose the Basic Package along with one of the Lenses provided below.

Basic Package [+60]

+) Arms and Legs exchanged for cybernetics [-12]

No Fine Manipulators (Mitigator: Cyberarms DR3, HP as usual -80%) [-6]; Legless (Mitigator: Cyberlegs DR3, HP as usual -80%) [-6]
 +) *Vital Organs strengthened* [+20]

 Arm ST+5 (TD: Electrical -20%) [+20]

Cyborg Lenses

Cyber-Humanoid [+140]

by zorg

This option is more subtle than most cyborg options. The character still looks human and is therefore a capable infiltrator or agent.

Biocovering/Living Tissue Disguise [-7]

Appearance: Hideous (Mitigator: LTD, easily damaged, hard to repair, cannot be stolen -60%) [-7]

Improved Optical Systems [+52]

Night Vision 7 [+7]; Infravision [+10]; Ultravision [+10]; Telescopic Vision 2 [+10]; Protected Vision [+5]; Scanning Sense: Ladar (TD: Sessile -50%) [+10]

Comm-Unit [+20]

Sharp Claws (Armor Divisor 2 +50%) [+8]; Strong Venom (Pow144) [+22]

Weapon Systems: Close Combat 2 [+30]

Affliction 3: HT-2 (Follow-Up on Punches +0%) [+30]

Improved Suspension [+15]

Double-Jointed [+15]

Heavy Combat 'borg [+140]

by zorg

Well, yeah. You guessed it: this option is for those who like to kick ass.

Appearance: Monstrous [-20]

Armored Endoskeleton [+50]

DR5 [+25]; DR5 (Ablative -80%) [+5]; Recovery [+10]; High Pain Threshold [+10]

Targeting System [+40]

Scanning Sense: Ladar (Targeting Only -40%) [+12]; Night Vision 3 [+3]; Gunslinger [+25]

Combat Optimized [+70]

ST+5 [+50]; Talons (Armor Divisor 2 +50%) [+12]; HP+4 [+8]

Ninja-Cyborg [+140]

by zorg

This option tries not to look as inhuman as other cyborg packages, with limited success. This shouldn't be a problem - Ninjas are never seen, anyway.

Appearance: Hideous [-16]

Stealth Systems [+37]

Obscure 5: Radar, IR (+20%; Defensive +50%; Stealthy +100%) [+27]; Silence 2 [+10]

Virus-Carrier [+29]

Affliction 2 HT-1 (Seizures +100%, Cybernetic Only -50%, either Reverse Blood Agent or Telecommunication (Radio or Laser) -20%x-40%=-08%) [+29]

(Note: Actually a mouth-mounted plasma gun)

Comm Unit [+20]

Telecommunication/Laser [+15]; Alt: Telecommunication/Radio [+2]; Alt:
Telecommunication/Infrared [+2]; Neural Interface [+1]

Mining-Borg [+140]

by zorg

A rather civilian, but quite tough option.

Appearance: Monstrous [-20]

Armored Endoskeleton [+50]

DR5 [+25]; DR5 (Ablative -80%) [+5]; Recovery [+10]; High Pain Treshold [+10]

High Performance-Actuators [+55]

ST+4 [+40]; Lifting ST+5 [+15]

High Performance-Drill [+55]

Tunneling/Slow 2y/min (All-Out -25%) [+5]; Plasma Torch (Pow139) [+50]

Psiborg [+140]

by zorg

Someone thought it would be a good idea to add brain implants to a cyborg which stimulate certain psionically significant areas of the brain. The result is mixed - though the 'borg does develop certain Psi powers, there are severe side effects.

Appearance: Monstrous [-20]

Brain Implants [+50]

ETS (Resistible Backlash: Severe Pain -20%) [+36], Danger Sense (ESP -10%) [+14]

Psi-Powers [+110]

Choose two out of: Psychokinesis, ESP, Telepathy, Psychic Vampirism - you get Talent 1 and 50 CP to spend for each. All psionics must have - in addition to the Psi-10% power modifier - either Resistible Backlash: Severe Pain (-20%) or RB: Hallucinations (-25%).

Null-Psiborg [+140]

by zorg

In order to provide a countermeasure for the Psiborg. Stimulate other areas of the brain, and you get a walking, talking Psi-Impeder. The EMP was just added for good measure.

Appearance: Monstrous [-20]

Brain Implants [+75]

ETS (Resistible Backlash: Severe Pain -20%) [+36], Danger Sense (ESP -10%) [+14];

Recovery [+10]; Intuition [+15]

Antipsi-Powers [+55]

Antipsi-Talent 1 and 50 CP in Antipsi (Antipsi +0%)

Weapon System [+30]

EMP-Shock: Burning Attack 4d (No Wounding -50%; No Incendiary Effect -10%; Surge +20%; Reduced Range /2 -10%; Rapid Fire 10 +100%) [+30]

Samurai Demon Hunter [200 Points]

originally by Fnordianslip, edited by zorg

Attributes: ST+2 [+20]; DX+2 [+40]; HT+2 [+20]; Will +2 [+10]; Per +2 [+10]; FP+1 [+3]

Advantages: Musashi Style Blademaster [+44]; Five Rings [+55]; Mystical Awareness [+40]

Disadvantages: Giri [-42]

Musashi Style Blademaster [+44]

Cutting Attack 2d [+38 Points]

(Armor Divisor 2 +100%; Melee Attack: ST-Based, +100%; Melee Attack: Dual, +10%;
Melee Attack Reach 1 or 2 -25%; Accessibility: Must have cutting weapon in hand -20%)
+ Alternative Impaling Attack 1d [+5 points]
(Armor Divisor 2 +100%; Melee Attack: ST-Based, +100%; Melee Attack: Dual, +10%;
Melee Attack Reach 1 or 2 -25%; Accessibility: Must have impaling weapon in hand -20%)
+ Signature Gear [+1]: a bladed weapon of some sort. The skill for this weapon is used for the
above attacks.

Five Rings [+55]

Ambidextrous [+5]; Combat Reflexes [+15]; Enhanced Parry [+10]; Extra Attack 1 [+25]

Mystical Awareness [+40 Points]

Detect Magic/Psi (Reflexive +40%; Precise +100%) [+24]; Mind Shield 3 [12]; Magic
Resistance 3 [+6]

Giri [-42 Points]

Duty: Samurai Clan, 6 or less, extremely hazardous [-7]; Enemy: Various
Mages/Demons/Psis, 6 or less [-15]; Vow: Fight Supernatural Evil without using high-tech
weapons [-10], Code of Honor: Perfect body and soul, practice constantly, use no modern
weapons, be courteous, courageous, modest and loyal [-10]

Telluric Master [+200]

by zorg

Advantages: Telluric Senses [+22]; Telluric Voice [+24]; Telluric Warp [+80]; Telluric
Contemplation [+13]; Projected Eyes [+38]; Telluric Walker [+12]; Energy-Matrix [+11]

Prerequisites: Magery 1 [+15]

Recommended Skills: Navigation (Land); Hidden Lore (Demonology); Thaumatology, Expert:
Telluric Currents. And spells, of course.

Recommended Advantages: Fearlessness, Mind Shield (Magical); Strong Will

Recommended Disadvantages: OPH: rambles about the mystical significance of TC at the
drop of a hat

Telluric Senses [+22]

Detect: Telluric Currents and Pools (Magical -10%; Reliable +2 +10%) [+5]; Detect: Magic
(Magical -10%; Vague -50%; Short-Range -10%) [+3]; See Invisible/Magical (Magical -
10%) [+14]

Notes: Basic abilities for any wizard, really.

[Alt+5]

Projected Eyes [+38]

Clairvoyance (Visible -10%; TD: No Sense Smell/Taste -5%; Increased Range x10 +30%;
Accessibility/TC -30%; Magical -10%) [+38]

Notes: The "Visible" part looks just like a translucent, slightly glowing image of the caster.
Whether this is an idealized version (as the caster sees himself) or a realistic version is a
matter of taste. Though the idealized version sure is more mystical.

Telluric Voice [+24]

Telecommunication: Telesend (Reliable 10 +50%; Magical -10%; Environmental/TC -30%;
Accessibility/TC -30%; Feature: Others with this ability can eavesdrop on a successful Per +
IQ roll - Per to notice, IQ to decipher) [+24]

Notes: Environmental means the target of your ability must be on/in or very near a Telluric
Current (Dragon Line, Chronobahn...). Accessibility means the user himself must also be
on/in or very near a TC. Any wizard needs some communication ability, and this fits the bill.

Telluric Warp [+80]

Warp (Accessibility/TC -30%; Magical -10%; Reliable +10 +50%; TET 6*) -60%; Blind +50%; Limited Uses 4 -20%) [+80]

Notes: The TET means 64 seconds. Note that this power does *not* have Environmental, so one could warp to any location, not just one on/in a TC.

Telluric Walker [+12]

Walk on Air (Accessibility/TC -30%; Magical -10%) [+12]
[Alt+3]

Telluric Contemplation [+13]

Rapid Healing (Accessibility/TC -30%; Magical -10%) [+3]

Regeneration/Fast (ER Only +0%; Magical -10%; Accessibility/TC -30%; Maximum Duration Up to 1 hour -10%; Takes Recharge 500 minutes -30%) [+10]

Notes: Initially, I wanted to use Limited Use on this. However, Maximum Duration seems to be much superior.

Energy-Matrix [+11]

Energy Reserve 12 (Magic Only -10%; Recharges one point per day -60%) [+11]

Mystic Master [+200]

by zorg

Advantages: Trust your feelings [+14]; The Art Of Magic [+24]; Mystical Energy [+9]; Detect Evil [+4]; One with the world [+29]; Let the spirits speak [+27]; Exorcism [+18]; Danger Sense [+14]; ESP Talent 1 [+5]; Healing Talent 1 [+5]; 50 CP in ESP (Psi -10%); 50 CP in Healing (Psi -10%)

Prerequisites: Magery 0; Disciplines of Faith: Mysticism [-10]

Taboo Traits: Magery 2 and up, Spells as Skills, Fanaticism (he's too much in balance for that)

Recommended Skills: Philosophy, Theology, Thaumatology, Psionics, Meditation

Recommended Disadvantages: Wealth (or rather the lack of Wealth), Pacifism, basically any Self Imposed Disadvantage

a) Magic Powers

Trust your feelings [+14]

Intuition (Magical -10%) [+14]

The Art Of Magic [+24]

Cosmic Modular Ability 6 (Spells Only -20%; Prep Time 10 minutes -30%; Personality-Aspected -10%) [+24]

Notes: The PrepTime is spent meditating, only then may the Modular Pool be spent. Since the Mystic Master draws heavily upon his "inner self" (whatever that may be), he is limited in his choice of spells. He may not choose spells which contradict his Mental Disadvantages. Frex, if the MM is Callous, he may not choose Healing Magic, if he is Overconfident, he may not choose Protection/Warning spells, if he has Code of Honor: Knight, he may not use Necromancy and so on. In general, the character should be forbidden from choosing at least one or two big spell categories. This requires GM supervision, obviously.

Mystical Energy [+9]

Energy Reserve 10 (Magic Only -10%; Recharges one point per day -60%) [+9]

Taboo Trait: Magery 2 and up, Spells as Skills

Notes: The MM can never learn a Spell as a Skill (as per the standard rules). He is limited to his Modular Ability, which he can freely spend CP on. He can never remove the Limitations

on the Modular Ability, though.

b) Psi Powers

The following abilities belong to the Mystic-Master Power (Psi). The character can buy a Mystic Master Talent [5/lvl], if he so desires. The Power includes variations and extensions of the listed abilities. Most new abilities should somehow focus on introspection, meditation and the spirit world. The Power Modifier is "Mystic Master Psi", short: MMP.

Detect Evil [+4]

Detect: Supernatural Evil (MMP –10%; Vague –50%; Reflexive +40%) [+4]

Notes: This abilities works as a passive sense, so the character may get information without special concentration.

One With The World [+29]

Invisibility (TD: Sessile –50%; Link +10%; MMP –10%; Switchable +10%) [+24] + Zeroed (Divination Only –50%; Link +10%; MysticPsi –10%) [+5]

Notes: Well. As long as you sit there meditating, you are invisible to the naked eye and all divination/information magic. You can still be touched, though.

Let The Spirits Speak [+27]

Channeling (MMP –10%) [+9]; Precognition (Passive Only –20%; MMP –10%) [+18]

Exorcism [+18]

Terror (Only vs Possessing Spirits –50%; Exposure Time 1 minute –30%; MMP –10%; Cosmic +50%) [+18] [+6/-1 Fright Check]

This Exorcism affects creatures which are usually immune to fear (Unfazeable or whatever). After a possessing spirit (that is a Spirit with Possession, which is possessing someone) has witnessed the Mystic Masters preparations for a full minute, it may panic (and hopefully leave its host). The successful use of this ability should definitely give a bonus to the Exorcism skill (+1 per point the target failed its Fright Check by?).

Danger Sense [+14]

Danger Sense (MysticPsi –10%) [+14]

The Mystic Master also has a Talent for the Healing Power (Psi -10%) and the ESP Power (Psi -10%). He may spend 50 CP on each Power (or, with GM approval, 100 CP one of them).

Plane Walker [+200]

by zorg

Attributes: Will+1 [+5]

Advantages: Planar Energy [+9]; Plane Walk Home [+20]; Familiar [+11]; Magery 2 [+25]; choose either: Supernatural Master or: +2 IQ [+40]; Dimension Travel Talent 1 [+5]; Feel Dimensional Portals [+5]; Unfazeable [+15]; Command the horror from beyond [+75]

Disadvantages: Secret: Plane Walker [-10]

Prerequisites: One of Bully, Overconfidence or Curious

Taboo Traits: may not learn spells from Colleges other than: Body Control, Gate, Illusion, Making and Breaking, Meta, Movement, Necromancy, Elemental (Air, Fire, Water, Earth)

Planar Energy [+9]

Energy Reserve 10 (Magic Only –10%; Recharges one point per day –60%) [+9]

Feel Dimensional Portals [+5]

Detect: Dimensional Portals (Magical –10%; Reliable +2 +10%) [+5]

Plane Walk Home [+20]

Jumper (Home plane only –50%, Costs 6 FP –30%)

Familiar [+11]

ER 8 (Granted by Familiar –40%; Magic Only –10%; Recharges one point per hour –20%) [+8]; Ally (Minion +50%; Sympathy/Auto-Kill –50%; 25% point total; available 15 or less) [+3]

Supernatural Master [+40]

Patron 20 CP base (Minimal Intervention –50%; Accessibility: Ley Line crosspoints only –50%, Special Abilities: Teaches Spells, knows secret things +50%; Appears on 9 or less) [+10]; Enemy (Rival x1/2; Appears on 6 or less x1/2) [-5]; +5 HP (Magical –10%) [+9]; ER 10 (Magic Only –10%; Recharges one point per hour –20%) [+21]; Magery +1 (One-College Magery – choose Necromancy or Gate –40%) [+6]; Quirk/Delusion: I can control the entity [-1]

Notes: the Plane Walker makes a pact with some sort of extradimensional intelligence. This entity is immensely powerful and malevolent. Though it grants the character mystical energy and power, it does not have his best interests in mind (Surprise!). From time to time, it will give misleading or plain wrong information which may embarrass or hurt the character (though not kill him - the creature doesn't want to lose its servant). The creature can only be contacted where the structure of reality is weakened, such as at points where several Ley Lines cross.

No character would make such a pact without believing that he was in control of the situation.

Command the horror from beyond [+75]

Mind Control (Magical –10%; Hearing Based –20%; Accessibility: Only on entities not native to your home plane of existence –50%; Extended Duration x100 +80%; Cosmic: successful resistance doesn't grant temporary immunity +50%) [+75]

Techno-Wizard [+200]

by zorg

Attributes: IQ+1 [+20]; Per-1 [-5]

Cosmic Modular Ability 50 [+100]

(Only for: Affliction *) -50%; Requires IQ roll –10%, Accessibility: Requires costly stuff + workshop –30%) [2/level]

*) All Afflictions must have these modifiers: Malediction 1, Touch-Based; Extended Duration: Permanent; Preparation Time: One hour; grants Advantages**)

**) All advantages granted must have these modifiers: Gadget-Based, Magical, Costs FP

Notes: You can create Devices which can grant any advantage, as long as it is magical. These

devices can only be used by those with some sort of Magery (simulated by “Can be stolen, won’t – usually – work for the thief”), and they remain functional indefinitely. To create such a device, you need at least an hour, as well as a workshop equipped with expensive machinery and technomagic paraphernalia.

It is probably easiest to afflict oneself with the created Gadgets. If an Affliction fails to work (because the character fails his HT roll), this can be explained by design flaws which need to be corrected for another try. As soon as the Affliction works, the Gadget is created and can be given away. Note that Extended Duration: Permanent means that the Gadget is a permanent creation, which remains even if the CMA pool is rearranged.

Note that the target of these Afflictions is not a device, but a person. To empower a device instead, the Affliction would have to have the “Accessibility: Only on Machines”, and the granted advantages wouldn’t need to be Gadget-Based. This way is also feasible, but not the one I chose.

Examples:

Electricity Generator [+20]

Create Electricity 5 (Gadget-Based (DR6-15; Repairable; Can be stolen by force, SM-7) – 30%; Magical –10%; Accessibility: Only usable by M0+ –30%; Costs 2 FP –10%) [4/1vl]

(short: CyP)

This power requires the use of a neurosynaptic enhancer. This device looks like an apple-sized sphere of dark metal, which sprouts a pencil-thick cable. This cable is plugged in to your lower arm, while the sphere is held in the hand. If the sphere is forced open, it will explode violently. If a thief is willing to pierce his skin with the cable, he can use the device.

Drug-Psi (-15%)

This power is awakened by the constant use of Hashish, opening and expanding the users mind (don't try this at home, kids). Every use of psionic powers triggers a psychedelic flash. Users of this power are known to sometimes target their own hallucinations. Drug-Psi cannot be blocked or suppressed by normal techniques.

Proton Gladitorial Combat Robot

Model Horus-2 [+100]

By zorg

This is a light robot designed for fast-paced gladitorial combat. It's perched on 6 legs, with the torso sitting centaur-like atop. The Horus relies on mobility, quick jumps and its camouflage system to avoid damage.

The Sekhmet-variant is identical, but uses twin swords instead of machine pistols and two light chainguns instead of missile launchers.

A remote operator, who earns prize money for destroying other robots and obstacles, usually controls the robot. Certain robots are autonomous; these are added to an arena to turn up the heat.

Chapter 3 - Other Templates

Corpse [-120]

By Atreyu Hibiki

Advantages: Doesn't Breathe [20]; Doesn't Eat or Drink [10]; Injury Tolerance (Unliving) [20]; Legal Immunity [10]; Psi Static [30]; Immunity to Metabolic Hazards [30]; Zeroed [10]

Disadvantages: Bad Smell [-10]; Blindness [-50]; Deafness [-20]; Mute [-25]; No Sense of Smell/Taste [-5]; Numb [-20]; Quadriplegic [-80]; Supernatural Feature: Pallor [-10]; Unhealing [-30]

Features: Spirit Not In Body [0]

Notes: Designed for use with Alternate Form afflictions that could, potentially, raise a corpse into a zombie, or that can revive a person completely. Other uses are left as an exercise (or is that exorcize?) for the sadistic GM. Apply this template to the stats of whoever the dead person was in life. Basic stats and abilities are kept intact, just not in contact with the body, unless the corpse is acted on from an outside source. Spirit Not In Body allows us to overlook the fact that the remainder of this template would have the person be completely alert during, say, burial or cremation, but not able to move or speak.

Modifying: In some campaigns, Social Stigma: Dead might be appropriate.

Free Trader [+2,011]

By Nik1979

\$2M

Simply named for its main purpose, this merchant vessel can comfortably accommodate several passengers and keep space worthy for up to 4 months if fully fueled. There was a lot of history to its design, as it was made to break the corporate monopoly on inter planetary trade. The Free Trader became the template many future generation of trader vessels are based.

Appearance: An intelligent wing body design based on mid 21st century re-usable and as big as one, there is no secret where the inspiration of this ship came from.

Encountered. One of the most common ships encountered (at about 10% the original work horse design and 20% variations, knockoffs, and salvaged)

Man of War [+3,513]

\$5M

By Nik1979

Also called the “Man’o’War”, the Man of War is a standardized corvette design that has been in use for almost as long as the Free Trader’s. The main template many armed escort ships have been derived and most are still running up to now.

Appearance: A wing body design common to ships expected to travel in atmosphere but stockier and with more stubborn lines expected in such a robust vehicle.

Encountered. The most common armed vessel, many poorer governments have used this effectively as their staple force with few modifications. Some wealthy governments have used fleets of this ship instead of developing anything more advanced and have proven to economically as it is military effective. With so many variations, almost a 3rd of all encounters are of some variety of Man of War.

Winged Monkey Template [50 points]

By Mysterious Dark Lord v3.2

Attributes: ST+1 [+10]; DX+2 [+40]; IQ-2 [-40]; HT+2 [20]

Secondary Attributes: Perception +3 [15]

Advantages: _Arm ST: 2 Arms +3 [15]; Brachiator [5]; Damage Resistance 1 [5]; Extra Arm (Extra Flexible +50%; No Physical Attack -50%; Weak: One-Quarter ST -50%) [5]; Extra Arms x2 (Foot Manipulators -30%) [14]; Flight (Small Wings -10%) [36]; Sharp Teeth [1]

Skills: Climbing-DX+2 [2]; Flight-DX [2]

Quirks: Likes Wearing Bellboy Hats [-1]

Notes: These are your classic Winged Monkeys, the perfect minions of wicked persons everywhere (especially places Over The Rainbow). They look like some species of tailed ape (except for the wings and silly hats), but are capable of clear speech and understanding explicit orders. They have an average IQ of 80, but a Minion of Evil doesn't need too much brainpower, does he?

Dwarfism is included because the Winged Monkeys are assumed to be former humans who have been changed into their current forms (and shrunk by half their height) by Evil Forces. Thus there is no "Winged Monkey Culture", no place they would fit in, and Dark Overlords are not known for making their Evil Lairs accessible to the differently-enabled, so they suffer the difficulties of Dwarfism. If you don't like this interpretation, remove Dwarfism and Perception, and the point costs balance out.
